

Compost Tea

Compost tea is a refreshing beverage for your plants—indoors and outdoors. To start, we steep worm castings, effective micro-organisms, and molasses in harvested rain water. Our compost tea is oxygen-brewed and contains high levels beneficial bacteria for your plants. It is ready to use without any mixing or diluting.

Why use Compost Tea?

- Fends off many common plant diseases and harmful pests
- Helps to make your soil healthy so it can hold more nutrients & moisture
- Healthier soil means less water usage and run-off
- Beats the pants off of using harmful chemicals and pesticides

How do I use it?

Spray once a week on soil until damp.

Mist lightly once a week on leaves to help your plant resist pests and disease.*

* For delicate and young plants: test a small area first to ensure Compost Tea is not too strong
